A Water Supply Improvements Study was completed in 2007 for the West Bench water service area which is managed by the West Bench Irrigation District (WBID). The report included a review of water demands, water quality objectives, water treatment requirements, and options for supply water to the West Bench service area.

**Water Supply Improvements Options Review Study** - Completed by Associated Engineering, 2007

The report was further expanded to include a modification of **Option 3 - UV: Phased Joint West Bench/Sage Mesa System**
